

# YES, we want to endorse the Global Campaign for Microbicides

The Global Campaign for Microbicides is a broad-based, international effort to increase access to user-controlled HIV and STD prevention technologies. We endorse the Campaign's goals to:

- Raise awareness and mobilize political support for increased funding for microbicide research, female condom and cervical barrier methods;
- Create a supportive policy environment for the timely development, introduction and use of new prevention technologies; and
- Ensure that as science proceeds, the public interest is protected and the rights and interests of trial participants, users, and communities are fully represented and respected.

We understand that no fees are involved, but that endorsing organizations are asked to participate in any of the following ways:

1. Undertaking educational efforts to raise public awareness;
2. Joining in targeted advocacy efforts to educate elected and appointed policy makers about the need for greater public investment in new HIV prevention options.
3. Supporting efforts to ensure meaningful community and civil society participation in microbicide research, development and eventual introduction.

Please add my organization's name to the international list of Campaign endorsers:

Organization: \_\_\_\_\_

### My Organization's Portfolio:

These are my organization's key types of work (Please highlight those areas in which Global Campaign activities might best be incorporated):

---

---

---

---

The Global Campaign is committed to providing you with materials, technical assistance and suggestions to help your organization become actively involved in advocacy for microbicides and expanded HIV prevention options. Please indicate which of the activities below your organization is most likely to get involved in.

My organization would most likely get involved in the following kinds of activities:

Generating media coverage

Advocacy with legislators and other policy makers

Petition/Postcard Drive

Recruiting additional Campaign endorsers

Public education activities  
(Community Forum, tabling at public events, Speakers Bureau, etc.)

Educating colleagues and local constituencies (via presentations at meetings and in-service training, putting microbicides on the agenda at local coalition meetings, etc.)

Representing the Campaign at conferences (via organizing plenary presentations, submitting workshop abstracts, staffing exhibit booths, etc.)
